## Choke Tester

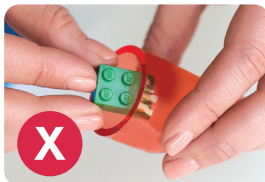

Under the age of 2, children explore the world by placing anything within reach into their mouths. It is therefore important to keep small objects that they could choke on out of reach.

**But how small is 'small'?**

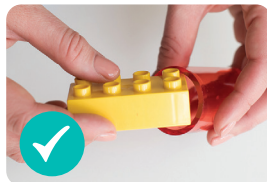

### How to test:

Simply place any small object into the Choke Tester. If the object fits completely inside the Choke Tester, with nothing protruding past the top diagonal edge, then it is too small and should be kept away from children under the age of 2.

**X Not Safe**

**✓ Safe**

### Additional checks:

- 1 Does a larger object have small parts that could easily be removed and fit inside the Choke Tester? If so, this should also be kept away from under 2's.
- 2 Is the object soft and pliable so that it can be squashed to fit inside the Choke Tester? Again, if this is the case, keep it away from under 2's.

### Safety Warnings

- **WARNING!** Adult supervision required.
- **ATTENTION!** This tool cannot replace adult supervision. Never leave children unattended. This is not a toy, do not allow children to play with it.
- Check this tool regularly to ensure it is safe to use and working correctly. If worn or damaged, remove immediately and replace as needed.
- This tool is designed to offer protection for children up to the age of approximately 24 months.
- If you are unsure if something is or isn't safe, keep your child away and consult a professional.

## Other Important Information

- **Care instructions:** Wipe with a damp cloth.
- Claims against warranties or guarantees must be arranged through your retailer, seller or trader. Proof of original purchase is required.
