

Soft-Touch Baby Bath Support

A bath is a great way to start the bed time routine, and with a Baby Bath Support, you and your baby can relax and have fun together.

- hands-free for you - perfect for bathing twins or older children together
- safe, comfortable splashing for your little one promotes water confidence
 - gently supports your baby at the perfect height
- baby's body + head are softly cradled allowing arms + legs to move freely
 - hygienic + mould resistant

Instructions for use:

- 1 Push the bath support down firmly into the bath until the suction cups grip. Suction cups should not be placed on non-skid, slip resistant surfaces.
- 2 Fill the bath no higher than the 'max' water line (see front of leaflet). Test the water temperature, it should not exceed 37°C / 88°F. Make sure everything is to hand so you don't need to leave the room before bath-time is over.
- 3 Position your baby at the base of the Bath Support. Ensure water level is not higher than your baby's shoulders. Recommended bath time = 10 minutes maximum.
- 4 When your baby is out of the bath, dry and safe, remove the Bath Support by gently pulling the two small tabs to release the suction cups. Check these cups often and replace if their grip decreases.

BPA
free

Safety
Tested

WARNING: PREVENT DROWNING. ALWAYS KEEP THE BATH SUPPORT AND YOUR BABY WITHIN SIGHT AND REACH OF AN ADULT.

- Drowning can occur in a very short time and in very shallow water (2cm). The Bath Support does not provide any additional safety related to water hazards.
- Do not allow other children to substitute for ADULT supervision.
- If you have no choice but to leave the bathroom, take your baby with you.
- Never lift or carry the Bath Support with a baby in it.
- Stop using the Bath Support when your baby can sit unassisted.
- Do not use the Bath Support if it is damaged, broken or if suction cups have lost their grip.

Bath Support made from polypropylene and SBS rubber. Made in France. Tested to Safety Standard XP S 54 048 and EN71-3 (relevant clauses). Registered Design.

Read carefully and keep for future reference.
